

Ethafoam Polyethylene Foams

Thick, Single-Layer Extruded Foam Plank

Ethafoam® high-performance, extruded, closed-cell polyethylene foam products are manufactured to meet the highest quality and environmental standards, and are ideal for a wide range of packaging and non-packaging applications.

- Premium polyethylene foam product
- Excellent dimensional stability and recovery
- Optimal cushioning protection against repeated impacts
- Outstanding appearance
- Large selection of densities and colors available

Stratocell Polyethylene Foam

Laminated Foam Plank

The Sealed Air line of Stratocell® foams feature up to 6" of laminations improving product performance.

- Laminated foam plank product
- Cushioning protection using less material
- Easier fabrication with softer surface and heat-bonds without skiving
- Versatile thickness offering which can be made to order
- Laminated film or high density foam layer provides extra strength and durability
- Large selection of densities and colors available

Cellu-Cushion Polyethylene Foams

Roll Stock / Sheet Foams

This versatile foam has a wide range of uses from surface protection to consumer goods. Also available in flotation grades that meet UL-1191, ULC (Canada) and CE (Europe) specifications.

- Thin sheet foams
- Great for surface protection or light cushioning applications
- Available in either sheets or rolls
- Large selection of densities and colors available
